BigCheese

Your elite consulting team for three months

A **multidisciplinary squad of AWS-certified experts** at your disposal to accelerate your modernization, automation, observability, and governance initiatives.

What's the focus?

This team works alongside your organization to help you move faster and make better technical and strategic decisions.

✔ Security
✔ Architecture
✔ DevOps
✔ FinOps
✔ Data

Ideal for organizations that:

- ☑ Have a small technical team and can't afford to learn AWS from scratch

- ☑ Need expert support to implement, modernize, or automate in the cloud

- ☑ Want to reduce technical debt and improve operational efficiency

- ☑ Have strategic projects that require multiple technical profiles working in sync

- ☑ Want to move forward with focus and speed without hiring multiple roles separately

What's included?

- Specialized consultants:

- PM / Technical Lead, Cloud Architect, Software & Cloud Engineer, Data Architect, Data Engineer, Data Specialist, Developers, DevOps, FinOps, SysOps, Security Specialist

- Weekly technical coordination

- Role assignment based on your priorities

- Deliverable-based work for each sprint

Time and price

Why choose this Squad?

- AWS-certified team with real-world experience across multiple industries
- Full flexibility to focus efforts where they're needed most
- Measurable impact, sprint by sprint — no long waits

- Expert support that reduces the cloud learning curve
- Ideal for organizations that need results without spending time training their internal teams
